PRODUCT

Palayesh Paraffin Khavaran **OIL EMULSION** is a dispersion of OIL particles in a continuous phase of water which provide a useful means of delivering OIL to a product.

APPLICATION

Metalworking fluids and other industrial lubricants are typically Oil Emulsions. Oil Emulsion allows metalworkers to make use of both the lubricating properties of oils and the cooling capabilities of water.

Oil Emulsion is also used widely in agriculture industry.

Small particle size (about 1-5 micron) contributes to better paraffinic OIL penetration into the PRODUCT and provides more efficient properties needed to achieve.

PACKING

Khavaran Paraffin offers a full range of paraffin OIL EMULSION in a variety of packaging formats. These include: bulk liquid (via tank truck or railcar), and brand new or used drums.
